ATENEO DE ROBLEDO ANTONIORROBLES

Mr. Ringo Starr

Subject: A Message from Earth (and Space) to Ringo. Beatles Event in Robledo de Chavela, Spain

Dear Sir Ringo,

We are writing to you from Robledo de Chavela (Madrid, Spain), the historic site of the NASA Deep Space Communications Complex. As you may recall, in 2008, your song **"Across the Universe"** was beamed from our local antennas toward the North Star, Polaris.

To celebrate this cosmic connection, the City Council and the "Ateneo Antoniorrobles" are organizing a very special event on Saturday, April 4th. We are honored to have the following guests join us:

- **Jesús Portero:** The NASA engineer responsible for the technical transmission of your song into deep space.
- **Ignacio Martín Sequeros:** Founder of "Los Pekenikes," the band that had the distinct honor of opening for you at Las Ventas, Madrid, in 1965.

The tribute band *Beatles4U* will perform the exact setlist you played at Las Ventas, followed by an hour of your greatest hits. Our vision is to establish Robledo de Chavela as a permanent, annual meeting point for Beatles fans from all over.

It would mean a lot to us—and to the hundreds of fans attending—if we could receive a short written message of encouragement or a signed digital photo to display during the event. Knowing that the creators of the music currently traveling through the stars are aware of our tribute would be truly magical.

Our email address is: ayuntamiento@espacioobledo.com

Thank you for the music and for helping us reach across the universe.

With love and gratitude,

Ayuntamiento de Robledo de Chavela
